

Search Playback Share **Transcribe**

VIQ Media Manager is a powerful, flexible playback and management utility for your VIQ software installation. VIQ Media Manager works with any VIQ recorded audio and/or video.

VIQ's flexible database structure means you can search specific servers or workstations or the entire VIQ network at once, getting lightning-fast access to any recording on your system.

VIQ Media Manager can be run in standalone mode and installed anywhere, including home offices, with recordings quickly and easily imported.

Because VIQ Media Manager uses the same user-friendly interface as your VIQ Satellite recording workstation, no additional training is required.

VIQ Media Manager can serve as a powerful transcription workstation, with full access to audio and notes and integrated speed/volume controls.

- **Search:** Our Easy Search feature offers multiple independent search criteria, including recording number, participants or annotation text, making it quick and easy to find recordings
- **Playback:** Play multi-channel audio and video and view the associated notes for any current or previous recording
- **Share:** Burn recordings to CD/DVD or transfer files to VIQ AccessPOINT and NetScribe
- **Transcribe:** Playback can be controlled by footpedal, and independent speed and volume controls can be accessed via hotkey for fast, efficient transcription
- **And more:** Seal or unseal cases, print log notes, redact portions of recordings, clip out audio-video segments, and more

SYSTEM REQUIREMENTS

- Windows 7 Professional (64bit), Windows 8.1 Professional (64bit), Windows 10 Professional (64bit)
- Core i7 with 12 GB RAM
- 2 TB HDD with min. 7400 RPM
