

**VIQ EnConnect** is a [secure audio-video capture and collaboration app](#) for Apple iPhone and Google Android smartphones.

Capture a secure digital AV record using the simple, easy to use interface and your smartphone's front or rear camera. You can also add synchronized text notes during or after capture.

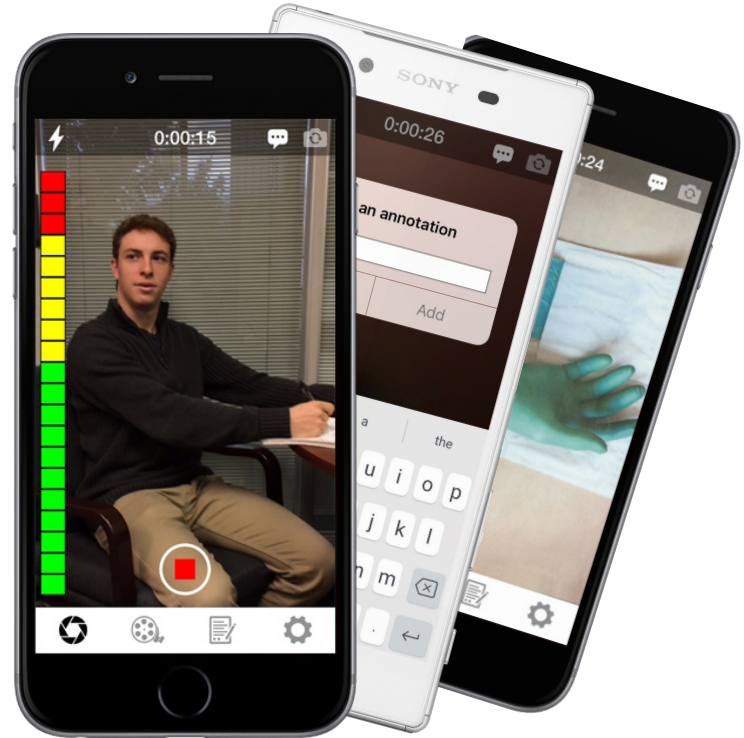

The audio, video and associated data is securely streamed to the sophisticated [VIQ back end management](#) platform via encrypted network connection.

Captured files can be routed to the [VIQ AccessPOINT web portal](#) for secure browser-based access and collaboration with other authorized users.

The entire capture process is [securely encrypted](#) using sophisticated algorithms that meet the highest cybersecurity and privacy standards, including HIPAA and PIPEDA.

## VIQ EnConnect...

- Provides anytime, anywhere digital AV capture of interviews, evidence, training/competency and more
- Enables timestamped text notes that highlight key moments during recording
- Encrypts your audio and video data to ensure that your files are kept private and secure at all stages
- Synchronizes captured videos and notes to VIQ servers (cloud or fixed) for central storage and access
- Synchronizes to VIQ AccessPOINT portal for secure collaboration and web-based access (optional)
- Includes integrated questionnaire options for complete training and assessment workflows

VIQ EnConnect is the ideal app for:

**Remote Interviews    Training**  
**AV Evidence Collection**  
**Assessment    Collaboration**  
**...and more**

## System Requirements

- iOS 8.1 or later
- Android 4.3 or later
- VIQ AccessPOINT not included
- VIQ EnConnect is free to download but requires the purchase of a subscription package from VIQ prior to use
