

VIQ Solutions provides a complete, integrated digital capture and management workflow for **hearings**, **meetings** and more. **VIQ Satellite**, our simple but sophisticated software, takes secure multi-channel digital recording to the next level.

VIQ Satellite captures **multiple channels** of independent digital audio and optional video. The system uses alarms and audible/visible **confidence monitoring** to ensure recording quality.

Multimedia attachments like **presentations**, **action plans**, **minutes**, **attendance**, etc., all become an **integrated** part of the record. You can also make synchronized text annotations that can aid in **transcription** or the creation of minutes.

Recordings can be easily **shared** among **authorized** users. VIQ Satellite records directly to harddrive with easy copy to servers, CD/DVDs or other storage devices. **Robust security** and “chain of custody” tracking protect your recordings and help keep them tamper-free.

Powerful search capabilities let authorized users quickly and easily locate previously recorded files using a range of criteria including **recording number**, **date/time** and **participants**.

VIQ Satellite lets you start simple. You can start with a single recording workstation and grow from there as your needs change. Optional advanced features like integration with third-party databases and automated fixed/cloud centralized storage can be easily added to enhance the capture, workflow and collaboration of your digital recordings.

→ Add multiple channels of video

VIQ Satellite provides:

- Simple, easy to use digital recording software designed for hearing and meetings
- Industry-leading security protocols and encryption
- Compatibility with a wide range of audio and video capture hardware to give you the most flexibility
- Hearings-specific interface that can be customized to suit your needs
- Flexible solution that grows as your needs change: easily add video capture, network synchronization, case management integration or web-based access to recordings

We provide the solution that's right for you, from a single microphone to a networked installation of dozens of rooms.

Contact VIQ for full list of system requirements.
