

VIQ SatCon is a secure audio-video control and management smartphone app with integrated voice to text annotation technology.

VIQ SatCon provides mobile remote control of VIQ's industry leading digital AV capture and management software from a simplified smartphone interface.

The secure smartphone app integrates with VIQ Satellite for simple mobile control of multiple channels of digital audio and video in multiple rooms.

Once authorized, operators can start, pause or stop capture, or schedule automated recording for the room using the simplified VIQ SatCon interface.

Operators can also make live voice notes and annotations that are automatically converted to text and integrated with the recording.

VIQ SatCon was designed with the same cybersecurity and privacy standards that have made VIQ the industry leader in secure digital capture and management solutions.

## VIQ SatCon...

- Enables control of multiple VIQ Satellite AV recording rooms via simplified smartphone interface
- Securely scans and connects to the VIQ Satellite recording room using intelligent workflow
- Allows advanced scheduling of recording for automated capture control
- Encrypts and authenticates all connections to ensure the ultimate in security and privacy
- Makes live speech to text notes that are synchronized and integrated with the recording
- Integrates with existing VIQ Satellite software and infrastructure

VIQ SatCon is the ideal app for:

**Police Interrogation Rooms**

**Surgery Rooms Training Rooms**

**Interview Rooms Courtrooms**

...and more

## System Requirements

- iOS 10.0 or later
- VIQ Satellite not included
- VIQ SatCon is free to download but requires the purchase of a subscription package from VIQ prior to use
