

VIQ Solutions provides a complete, integrated digital audio, video and evidence capture and management software workflow for **courts, police/ public safety, hearings, military, medical, education, transportation** and more.

At the core of our solution is **VIQ Satellite**, our simple but sophisticated software that takes multi-channel digital audio/video capture to the next level. Advanced features like indexed multimedia attachments, powerful search capabilities, integration with third-party databases, optional fixed/cloud central storage, user customization and unmatched security let you control the capture, management and collaboration of your digital AV recordings.

VIQ Satellite is compatible with a wide range of video and audio capture hardware to give you the most flexibility. We provide the solution that's right for you, from a single camera and microphone to a country-wide installation of hundreds of rooms.

With VIQ Satellite, you can:

- **Capture multiple AV channels:** Record multiple, independent digital audio and optional video feeds from a range of devices
- **Attach other digital files:** Pictures, scanned documents, reports, and more instantly become an indexed part of the record
- **Monitor recordings remotely:** Monitor multiple live audio/video feeds from a remote location
- **Secure your recordings:** Robust security and chain of custody tracking on all files on the system protect your recordings and help keep them tamper-free
- **Customize your system:** VIQ's extensive software profiles not only support multiple languages but also customer-specific nomenclature across all software

With all these great features, it's important to remember that the VIQ solution lets you start simple. You can start with a single recording workstation and grow from there as your needs change.

Three ways to capture...

Easy

For fixed locations, **VIQ Satellite's Advanced UI** offers multi-channel synchronized audio and video capture and advanced features like remote, multi-room monitoring and control and sophisticated playback and reporting functions.

Easier

If you're on the move, **VIQ Satellite's Simplified UI** provides all the features of VIQ's capture software in a simplified, touchscreen-friendly mobile package.

Easiest

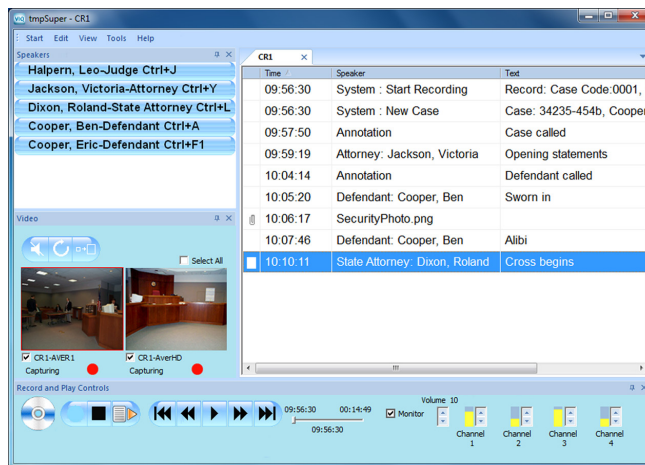

The **VIQ EnConnect app for iPhone and Android** provides basic AV capture functions with VIQ's powerful back-end management.

VIQ makes recording, searching and sharing audio and video easy, with a customizable software interface to give you the look and feel your organization needs.

VIQ Satellite offers:

- Simple, easy to use multi-channel digital AV recording software
- Indexed text or multimedia annotations
- Operation in standalone configuration for local recording or with automatic synchronization to VIQ server(s) for immediate backup and centralized access
- Multiple language and interface profiles that can be customized to meet your specific terminology
- Customizable hotkeys and phrase lists for fast annotation
- Multi-room monitoring and central recording control
- Ability to seal recordings to provide only authorized users with access
- Flexible audio and video hardware options including IP, BNC, and USB video sources
- Industry-leading security protocols and encryption

VIQ Satellite Advanced UI

Available Add-ons

Extend the power of your VIQ Satellite software with the following optional upgrades:

- **3rd Party Database Integration:** VIQ's Database Integration Tool can integrate your VIQ recording system with your 3rd party databases like Case Management systems, Docket Management systems, and more for the import, export and sharing of crucial information.
- **Remote Playback:** With VIQ Media Manager, you can easily access recordings for remote playback or transcription.
- **Web-based Access:** Secure online access to audio, video and notes through a standard web browser with VIQ AccessPOINT Portal.
- **Web-based Transcription:** VIQ's NetScribe provides an end-to-end web-based transcription workflow that gives instant access to recordings.

SYSTEM REQUIREMENTS

VIQ Satellite workstations (Multi-channel audio/video capture via external device)

- Windows 7 Professional (64bit), Windows 8.1 Professional (64bit), Windows 10 Professional (64bit)
- Core i7 with 12 GB RAM
- 2 TB HDD with min. 7400RPM
- SQL Express 2014 64bit
- Internet Information Services v7 (IIS7) installed
- 1 GB network card (connected to a Gigabit switch)
- 1024 x 768 display resolution (32-bit color depth min.)
- WDM-compatible audio device for playback
- ASIO-based digital recording device or card. USB 2.0+ port or PCI slot may be required.

Tablets (Multi-channel audio/video capture via external devices)

- Windows 8.1
- 12GB RAM
- 256GB SSD or better
- i7 or better
- Network port
- Touch screen
- ASIO-based digital recording device. USB 3.0 port required.

Servers (Optional)

- Windows 2008 Server R2 64bit or Windows 2012 Server 64bit (Virtual Server supported)
- SQL 2008 Server R2 64bit or SQL Server 2014 64bit
- Intel Xeon Processor with 12GB RAM and high speed and capacity storage (NAS, SAN, etc...)
- 1 available GB Network card

Contact VIQ for full list of compatible recording devices. Additional hardware may be required for video capture.
